

Lab 4 Tasks (File Management)

1. Write a C program in Ubuntu that does the following using system calls:
 - Create a file named marks.txt.
 - Ask the user to enter marks for 5 subjects.
 - Write the entered marks into the file, each on a new line.
 - Close the file after writing.
 - Re-open the file in read-only mode.
 - Read the marks from the file into a buffer.
 - Calculate the total marks and display them on the screen.
 - Close the file after reading.
